August 2026

Reeves Plains Energy Hub

Backed by  alintaenergy

Construction of Stage One of the Reeves Plains Battery Project is reaching a significant milestone.

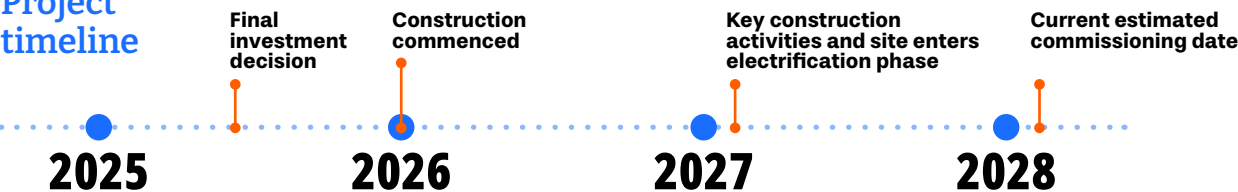

Reeves Plains Battery Project reaches major construction milestone

Over the coming months, residents may notice increased activity as key equipment is delivered to the project. Each battery and inverter unit is approximately the size of a standard 20-foot shipping container and will play an important role in the operation of the battery energy storage system.

There will be an increase in truck movements along Redbanks Road, with vehicles entering and exiting the project site between 7am and 5pm as the battery and inverter units are delivered. This will commence in early September and continue through to the latter part of the year.

The arrival of the first battery and inverter units marks an important step forward as construction continues and the Reeves Plains Battery Project begins to take shape. Once complete, the battery project will help store renewable energy when it is needed most, supporting a more reliable and resilient energy system for South Australia.

Project timeline

Alinta Energy Community Grants are now open

Got a great idea that tackles social disadvantage or environmental sustainability? Alinta Energy is offering grants of up to \$25,000 to support grassroots projects that can make a real impact.

We're backing small to medium not-for-profits across Australia with \$200,000 in funding each year. If your organisation operates in WA, VIC, QLD, NSW, SA or ACT and has a plan to create positive change – now's the time to apply.

3 simple tips for submitting

To improve your chances of a successful grant application, consider attaching:

1

A project plan

Quotations from suppliers

3

Ideas on how to measure the community benefit resulting from the project

"I'm very proud to work for a company that collaborates with not only the well-known charities like The Salvation Army and Foodbank but looks for ways to make sure we support smaller, not-for-profit organisations. It doesn't matter where the idea or project comes from, there is always a need for community services, social endeavours and environmental projects that make a positive impact on our way of life. I love hearing from our grant recipients about how our funding benefits their communities."

Melissa Galland, First Nations and Community Manager for Alinta Energy
