# NEIGHBOUR PROGRAM

## Reeves Plains Energy Hub - Battery Project (Stage 1)

The Reeves Plains Energy Hub is a significant development aimed at enhancing South Australia's energy security and grid stability. We're moving ahead with the construction of Stage 1 of the battery project. This stage of the battery can power the equivalent of around 300,000 South Australian households for up to four hours.

### Being a good neighbour is core to how we operate

Our Neighbour Program provides payments to nearby households to share the benefits of the project with those living closest to the project.

It's voluntary with eligibility criteria, and the payments structure is based on proximity to the battery project – Stage 1.

A separate Neighbour Program will be established if other assets are built at the energy hub.

### Eligibility

Entry into the Neighbour Program will be available to the owner of any dwelling determined to be within 1.5 kilometres of the battery project (Stage 1) during construction and 1km during operations, provided that dwelling:

- is habitable;
- has been occupied for a minimum of six months in the year before battery starts operation; and
- has existed as of January 2026.

# HOW DOES IT WORK?

Entering the Neighbour Program is entirely voluntary.

If a neighbour signs up, they will receive annual payments during construction, and then additional annual payments during operation, based on proximity of the battery project (Stage 1) to a dwelling.

If you think you're eligible and you'd like to participate in the Neighbour Program, please contact us by calling 0497 928 036 or by emailing [reevesplains@alintaenergy.com.au](mailto:reevesplains@alintaenergy.com.au).

Opting-in to the Neighbour Program will involve both you and Alinta Energy signing a short agreement that will outline the terms of the arrangement. These terms do not prevent neighbours from expressing their views for or against the project.

## Payment summary

- The owner of any dwelling within 1.5 kilometres of the project and which meets the other eligibility criteria is eligible to opt-in to the Neighbour Program to receive annual payments during construction. The amount of the payment is determined by proximity to the project.
- For the operational phase, eligibility is based on the project proximity to closer dwellings.
- Alinta reserves the right to offer additional payments if it considers that there are extenuating circumstances.

## Stay in touch

You can find more information on the project and register for updates on our website by scanning the QR code, or by getting in touch below.
